

BLUE BAMBOO
simple. reliable. affordable.

ABOUT this organization

This case study is about one of the large property developers and rental property owners in South Florida.

THE CHALLENGE

The property owner needs a mobile printer to print rental receipts “on the go”.

THE SOLUTION

To quickly generate rental receipts, the landlord downloaded PocketPOS Print from Apple’s App Store on his iPhone 5 and purchased a PocketPOS P25i mobile printer. PocketPOS P25i mobile printer pairs with iPhone over Bluetooth.

On PocketPOS Print he created one custom receipt for each tenant, which only requires entering month and year of collected rent having all other data pre-populated. These custom receipts were created without any development effort or previous knowledge.

When collecting a rent, the landlord opens PocketPOS Print, selects tenant custom receipt; enters month and date and presses print... that easy.

SUMMARY

In order to meet the needs of a mobile printer and not having an application developer, Blue Bamboo's P25i Bluetooth printer and Blue Bamboo's PocketPOS Print App iOS is a great companion that can perfectly meet the landlord's needs for printing custom rental receipts "on the fly". Customers can simply purchase the P25i mobile printer via Blue Bamboo's official merchant corner:
