

Customer Focus

- **Out Patient Registration Solution:**

The P200 is an EMV level 1 & 2, PBOC level 1 & 2, QPBOC level 1 & 2 and PCI 3.X certified POS terminal. Hospital staffs use Blue Bamboo Bluetooth P200 interfacing an iPad via blue tooth to read national medical insurance card (magnetic stripe card/chip card depends on different citizenship) and print receipt consist of Out-patient department, queuing number, how many people ahead, estimated waiting period, fund deducted, remaining funds, date and hospital information. The hospital staff will also use P200 to process payment from the national medical insurance card as well as debit/credit card for patients' clinic laboratory fee, medicine fee, etc and print receipt to defeat queuing during the whole Out-Patient diagnosis experience for retired people. The Application installed in the iPad will store the data in the national medical data server and send electronic invoice and receipt to the patient as well as the next appointment arrangement information, etc. [https://sales.bluebamboo.com/other_file/Out-patient%20regisration%20\(Bluetooth%20P200\)%20\(1\).pdf](https://sales.bluebamboo.com/other_file/Out-patient%20regisration%20(Bluetooth%20P200)%20(1).pdf)

- **Restaurant Kitchen Order Sequence:**

Partnered with Blue Bamboo enables chefs to receive instant order by printed from P25 from the electronic menu in the iPad. The P25 which buckled with the chef pairing with an iPad to print the order consists of table number, food, time, and overlap food from another table. This technology will save the time for waiter/waitress passing the order from the dining area to the kitchen and categorize automatically for overlap orders for chef to prepare together. This solution greatly increase the efficiency both in kitchen and canteen as well as squeezing more than for customer service and saving cost for the restaurant owners. https://sales.bluebamboo.com/other_file/P25%20kitchen%20sequence%20solution.pdf
